“The system proposed by DigiSoft is an essential support for the supervision and the business processes of our Company”

Antonio Tartaro - Co-Ceo Ivs Group

Managing all your Vending business process with one, integrated and independent system: **Vega VMS**

Sala Regia A.R.D Ivs Italia. Area Nord Est

One of the greatest challenges in Vending is the management of the data collected on the field and their use as a support to the decisions. The activities of merchandisers, technicians, commercials, warehousemen and all the info gained from installed V.M. represent a complex combination of data which Vega VMS is able to supervise, validate, manage and structure in KPI and supports to the decisions at all organizational levels.

Why is Vega VMS so special:

It is an international software used at an Enterprise level, translated in 12 languages, modulabile and settable

It is a product thought and developed in more than 30 years exclusively for the world of Vending

It is independent and interfaced with all the models of business off line, on line with sales streaming or EVA-DTS guaranteeing the total management of a mixed and not technologically aligned machine park

It is a product which balances the data in a unique repository, avoiding duplications, divergences and manipulations

It is future proof, as it is possible to connect modems and telemetry systems, as well as APPs and digital wallets, independently from the brand or the adopted technology

It is a solution which allows to set any kind of **billing rule**, based on counters, audits, rents, products sale...

It is a strengthened, trustworthy and certified product by the constant usage in more than 450 Vending company
